

READY WHEN YOU ARE

ECLIPSE
E-LINE SERVICES INC

WHO WE ARE

In today's world, energy companies need more than a one-time project executor. They need an agile and responsive specialty services partner – one who is ready to address and overcome any and every challenge and go where others cannot.

Eclipse is an industry-leading Canadian energy services company that provides Electric Wireline, Slickline, and Specialty Logging services with a state-of-the-art fleet.

Headquartered in Calgary, we service all of western Canada. We're ready when you are, wherever you are.

HSE PRIORITY 1

Health, Safety and the Environment are Priority One. Beyond being COR Certified and maintaining an above-average grade in ISN and ComplyWorks, we employ a full-time HSE Manager and trainer for our field personnel.

CORE SERVICES

CASED HOLE LOGGING

Our in-house Log Analysts provide detailed interpretations and reports for all Cased Hole Logs we complete. We offer Greaseless E-Line for all high pressure operations.

OFFERINGS:

- Casing Collar Locator
- Gamma Ray Neutron Casing Collar Logs
- Compensated Neutron Logs
- Pulsed Neutron Logging
- Corrosion Logging c/w Multi-Finger Calipers, Metal Thickness and Multi-Barrier Thickness
- Sonar Surveys
- Radial Cement Bond Logging
- Production Logging
- Noise and Temperature Surveys
- Free Point

SLICKLINE SERVICES

We believe in delivering on three core tenets: Reliability. Precision. Results. Our slickline services are designed to do just that.

OFFERINGS:

- Plug Setting (Otis, Baker)
- 1.25", 1.50" Slickline
- Critical Sour Operations
- Downhole Recorders to 15K (Static Gradients, Flow & Build-up)
- Plunger Lift
- Downhole Chokes
- Mechanical Perforating Services
- Picker Services

MEMORY LOGGING SERVICES

- Cement Bond Log & Radial Bond Log
- Production Logging
- Corrosion Logging c/w Multi Finger
- Caliper, Metal Thickness (MIT-MTT)

CASING INTEGRITY SOLUTIONS

Multifinger Imaging Tool (MIT 24, 40 and 60 Finger) surface readout and memory options available. 3D data and statistical analysis using proprietary software. Magnetic Thickness Toll (MTT) to show internal and external metal loss. Provides qualitative 3D images of well conditions. Eclipse Integrity Thru Tubing Tool (EIT3) measures wall thickness through multiple strings in a single pass – up to 18" casing.

COMPETITIVE EDGE

Eclipse E-Line is the exclusive provider of Flodin Sonar, EZ Cutter and Explorer Tools in Canada and we are the ONLY company in Canada that provides the E-Line Unit and Personnel trained to operate the cavern surveillance equipment.

CAVERN SOLUTIONS

Sonar Survey Instruments for use in caverns, mines, and quarries. Highest pressure and temperature capabilities with 3D viewer capabilities.

EZ Cutter for clean and controlled cuts. 73 mm EZ Cutter can cut most grades of steel from 14.3 mm – 273 mm. 4-in-1 Instrumented Explorer tool uses critical sensors to confirm well integrity prior to running subsequent E-Line logs or sonar surveys.

Cavity & Solution Mining

Oil & Gas

Deep Geothermal Energy

Hydrogeology & Mining

ADDITIONAL SERVICES

With a best-in-class team and an exclusive inventory of cutting-edge technology, state-of-the-art tools, and equipment, we provide Canada's most comprehensive suite of service offerings. We'll help you make informed operational decisions, all while delivering the results you need.

CEMENT BOND LOGGING

The rugged design of our tools provides unmatched performance: you'll get consistency, reliability, and accuracy in a wide range of environments and in Casing Sizes from 60.3 mm to 508 mm.

OFFERINGS:

- 43 mm RCBL Tools provide a 60° cement map rated to 150°C
- 70 mm RCBL Tools provide a 45° cement map rated to 150°C
- 70 mm RCBL Tools provide a 45° cement map rated to 207°C
- 79 mm RCBL Tools provide a 45° cement map rated to 150°C
- 89 mm RCBL Tools provide a 22.5° cement map rated to 246°C

E-LINE TRACTORS

Eclipse offers the Sondex E-Line Conveyance Tractors to accompany our full suite of Cased Hole Logging, Perforating and Pipe Recovery Services. To help us identify operational considerations we utilize WEST software (Well Entry Simulation Toolkit) as part of our pre-job planning and during the Tractor operation.

PIPE RECOVERY

Prevention is our #1 intention, and we have explosive and chemical free cutting options available for standard and coated pipe.

E-LINE SOLUTIONS FOR PIPE RECOVERY, INCLUDING:

- Titan Motorized Free
- Point Tools
- Applied Bellows Free
- Point Tools
- 43 mm Sonic Free
- Point Locator
- String Shot Back Off Services
- Tubing and Casing Jet Cutters
- Tubing and Casing
- Chemical Cutters
- Super Cutters for Tubing and Casing
- Split Shot Cutters
- EZ Cutter - 2 7/8" tool that can cut up to 10 3/4" casing
- Radial Cutting Torch

PERFORATING SOLUTIONS

Propellant options are available using Enhanced Energetics Kraken and GasGun to enhance production or injection rates, clean out a liner, or enhance a cement squeeze.

OFFERINGS:

- Electric Wireline Conveyed Perforating
- Through Tubing Perforating
- Tubing Conveyed Perforating
- Orientated Tubing Conveyed Perforating
- Coiled Tubing and E-Coil Perforating
- Pump Down Plug and Shoot
- ControlFire® RF Safe Perforating System
- Enhanced Energetics propellant products

ABANDONMENT SERVICES

We offer custom abandonment solutions for well abandonment and have you covered throughout your project.

OFFERINGS:

- Gauge Ring/ Junk Baskets
- Baker #10 & #20 Setting Tools for Casing Plugs
- 43 mm Setting Tools for Tubing Bridge Plugs
- Dump Bailers of All Sizes
- Segmented Cement Bond Logs
- Noise/Temperature Surveys for SCVF
- Compensated Neutron Logging
- Pulsed Neutron Logging
- Casing Swabbing
- Conventional and Derrick Units
- Advanced Shoot for Squeeze options using Enhanced Energetics
